

Doctor of Miracles

Part 6.1

Hormone Balancing, Immunity, Spleen Pain, and Vertigo

Molly Ingles Suffered with Multiple Health Issues for Years

Dr. Gilbert Jaudy, DC, DACNB, FACFN, FABVR, ABCDD

An Open Letter to Dr. Jaudy as published in the Healthy Times Newspaper

Imagine traveling down a road that, out of nowhere, suddenly becomes treacherous. Every step feels as though your foot will slip out from under you. The obstacles on this road will trip you up, and you are bound to fall. Everything you do only entangles you further. You are overwhelmed with trying to find the answers to finding a different route! This was a road that led me far from the peace that comes with having your health and well-being.

For several years I had searched for the answers as to why my health was deteriorating. I always felt so sick: Rashes, swollen lymph glands, pain in my spleen, low grade fevers, infections in my parotid gland and my equilibrium was out of control. My brain was sluggish and the pain and aching all over my body told me I was toxic. Fatigue plagued me always. To top it off, my body was not producing any estrogen or testosterone. For the last 10 years I received hormone replacement in the form of pellets. Epstein Barr virus always appeared to raise its ugly head frequently. Liver enzymes along with inflammation and infection throughout my whole body now tested high.

For these last 10 or so years I was seen by a variety of doctors: a GP, rheumatologist, allergist, cardiologist, ear nose and throat

specialists and a gynecologist, visiting both Loma Linda and UCLA. No one had answers as to why, only to treat the symptoms with prescriptions and hormones.

Spiraling down and out of control led me to a point where desperation had a pretty good hold on me. Reluctantly, I returned to a Dr. I had seen 10 years earlier for some of the same symptoms I was now experiencing. The answer was the same. He didn't know, however, he referred me to a neurologist for extensive testing. It was like a repeat all over again!

It was then I told myself. "I will never travel down that road again!" I knew I had the faith to find a better way, however the answer was not apparent to me until the following week.

My whole new direction had yet to unfold before me as I read in the Healthy Times Newspaper of Dr. Jaudy and his treatments. I knew the moment I read about him that he was the one to help me. After I met with him, not once did I ever feel as though I was taking a risk, even though I did not thoroughly understand his ways of treatments. Dr. Jaudy has an innate way of leading you on to a road of new-found health. He takes all the puzzle pieces of your broken health, and places them one by one back

together. It's as though he already sees you as a whole. His wisdom and knowledge surpasses anyone I have ever seen, pertaining to health.

For once in my life, I feel as though I am on safe ground and my foot is steady. I truly appreciate and thank Dr. Jaudy for his vision and desire to lead me to health. His care, compassion and encouragement far exceed any doctor I have ever seen. To watch him work is to know he truly cares for each and every patient. What I have obtained, just in knowledge alone, is priceless.

Almost all my symptoms are gone, and I no longer take the hormone replacement pellets. I still have a way to go and my faith did waver at times because this road is not a quick, temporary fix. However, on this road I

am experiencing healing and I will never choose to go back from where I came.

I know that God does the healing in a person's body. However, I also know Dr. Jaudy was a God-send and has been instrumental in helping to restore my health. For that I am forever grateful.

With Much Appreciation,

Molly Ingles
